SUMMARY

Highly motivated Data Science, Big Data, and AI student with a strong background in Computer Engineering. Proficient in Python, machine learning, and full-stack web development. Experienced in building scalable applications and automating systems, with a passion for solving real-world challenges through data-driven insights.

EDUCATION

National School of Applied Sciences (ENSA), Agadir 2024 - Present

second-year Engineering Student in DSBD AI

Specializing in Data Science, Big Data, and Artificial Intelligence

Higher School of Technology (EST), Agadir 2022 - 2024

Diploma in Computer Engineering

Imam Malik High School 2022

Baccalaureate in Physical Sciences

SKILLS

Languages	Python, Java, JavaScript, PHP, C, SQL
Data Science	Scikit-learn, NumPy, Pandas, Matplotlib, Statistics, Web Scraping
Web Development	ReactJS, TailwindCSS, APEX
Databases	MySQL, Oracle DB, PL/SQL, ArangoDB, Neo4j
Tools & Skills	ETL, Power BI, GitHub, Git, Docker, Technical Documentation

EXPERIENCE

Vala Bleu August 2025 - September 2025

Deep Learning Intern

- Developed *Feelscan*, a platform using deep learning, computer vision, and NLP to detect and analyze emotions from text and images.

Tec Forge July 2025 - August 2025

Data Science and AI Intern

- Engineered a data pipeline to scrape Moroccan public tenders and implemented semantic search functionality on the collected documents.

Creative Internet Solutions April 2024 - June 2024

Software Engineering Intern

- Built *GIG GALAXY*, a full-stack freelancing platform featuring service management for freelancers and an administrative control dashboard.

Creative Internet Solutions June 2023 - September 2023

Web Development Intern

- Developed *UCR (Unbelievable Car Rentals)*, a web-based car rental platform focused on streamlining the booking process and fleet management.

PROJECTS

Feelscan

Multimodal emotion detection platform utilizing Deep Learning to analyze text and facial images simultaneously. Developed the image analysis module and real-time API integration.

GitHub link: github.com/Mohamed-boufous/Feelscan

GIG GALAXY

Full-stack freelancing marketplace featuring a service management system for providers and a comprehensive administrative dashboard for platform operations.

GitHub link: github.com/Mohamed-boufous/GiG-Galaxy

TecForge

Scraping platform for Moroccan public tenders using embeddings and vector databases to enable advanced semantic search on tender documents.

GitHub link: github.com/Mohamed-boufous/Tecforge_project

Lbanka Dyalna

Comprehensive digital banking system built with Spring Boot, React, and Oracle DB/PL-SQL. Features dedicated portals for users, employees, admins, and super-admins.

GitHub link: github.com/Mohamed-boufous/Project_BDA

Projet-ETL-SQLServer

End-to-end ETL pipeline (SSIS) designed to centralize and analyze academic performance data, integrated with Power BI for advanced data visualization.

GitHub link: github.com/Mohamed-boufous/Projet-ETL-SQLServer

LibroLink

Digital library platform featuring an interactive reading interface, offer navigation, and a secure administrative space for content management.

GitHub link: github.com/Mohamed-boufous/LibroLink

Manager-Pro

JavaFX desktop application for intuitive sports tournament management, including team tracking, match scheduling, and persistent data storage.

GitHub link: github.com/Mohamed-boufous/Football-app-disktop

CERTIFICATIONS

1st Place - Oracle Hackathon for CAN Agadir 2025: Awarded at the Oracle Morocco RD Center for excellence in solution innovation.

NASA International Space Apps Challenge: Participated in the global hackathon, developing solutions for real-world earth and space challenges.

Oracle Cloud Infrastructure 2025: Certified AI Foundations Associate.

365DataScience Certification: Completed professional training in Machine Learning algorithms and data modeling.
